

ACADEMIC SCHOLARSHIPS AT NEXUS

Thank you for your interest in a scholarship at Nexus International School (Singapore). Applications are invited at two course entry points: Year 10 and Year 12. Broadly speaking, applicants should be at or around the age of 14 and 16 years respectively. All scholarships will be for two years initially and will be re-assessed at the end of that period.

Terms:

- Scholarships will provide for a reduction of 50 – 90% per annum in school fees
- All students will be expected to pay for their own MacBook Pro and essential software, and any incidental educational costs throughout the year such as uniform, books, school trips and educational visits
- All application, registration and development levy fees will be waived for successful applicants

For exceptional candidates, scholarships may be considered at other entry points. Please note that all siblings of full scholarship students qualify for a 25% reduction in school fees, subject to meeting our standard admissions criteria.

Successful scholarship candidates will enjoy the opportunity experience and benefit from a rigorous international curriculum:

Year 10 scholars will follow a 2 year Cambridge International General Certificate of Secondary Education (IGCSE) course of study. Cambridge IGCSE is the world's most popular international curriculum for 14 to 16 year olds, leading to globally recognised and valued Cambridge IGCSE qualifications. Schools worldwide have helped develop Cambridge IGCSE, which, at Nexus, provides excellent preparation for the International Baccalaureate Diploma Program (IBDP). It incorporates the best in international education for learners at this level. It develops in line with changing needs, and is regularly updated and extended.

Year 12 scholars will experience the International Baccalaureate Diploma Program (IBDP). The IBDP is an academically challenging and balanced program of education with final examinations that prepares students, aged 16 to 19, for success at university and life beyond. It has been designed to address the intellectual, social, emotional and physical well being of students. The program has gained recognition and respect from the world's leading universities.

The Nexus curriculum structure as a whole is designed to take advantage of the latest research into effective learning and is taught by a team of highly qualified and trained expatriate teachers with experience in international and British schools. Teachers make full use of the school's superb specialist facilities for subject teaching and provide a comprehensive co-curricular program.

The use of ICT is fully integrated in the learning of all subjects at the school. All learners have a MacBook so they can access our online learning environment and the Internet.

The GCSE and university entrance qualifications that scholars will gain at Nexus International School (Singapore) are accepted in almost every country and university in the world. Our programs are designed to prepare our students for entry to the university or training institute of their choice and we provide detailed career advice to ensure that students are well informed about their options.

Please see the attached document for full details of how to make an application. After assessment of applications, short listed candidates will be invited to sit for a final interview.

If you would like to talk further about any aspect of this letter, please contact admissions@nexus.edu.sg to make an appointment. We appreciate that the choice of school for your child is a very important decision and we look forward to discussing how your child might take advantage of this outstanding educational opportunity.

Yours faithfully,

Dr Stuart Martin

Principal
